Gross Annualized Rates of Return and Investment Management Fees (IMFs) as at April 30, 2012**Notes:****General Fund Performance Information**

- Returns are published for funds which have at least one full year of history. All performance data represents past performance and is not necessarily indicative of future results.
- Returns are calculated on a time-weighted basis. The returns are calculated after fund operating expenses (such as fund maintenance, and custodial fees, interest charges and taxes, where applicable) but before investment management fees (i.e. gross rates of return).
- The Investment Management Fee (IMF) charged covers the expenses incurred by Standard Life for the management of the said Funds and all or part of the cost of the administration of the plan, to the extent that such costs are not paid separately by the plan sponsor and/or yourself. The value of the market-related Funds is reduced by the IMF charged. Please consult your statement or visit the password-protected Member VIP Room, at www.standardlife.ca, for the net rate of return information on your plan.
- When you withdraw from a CIA fund prior to maturity, a market value adjustment may occur. For more information, please contact Standard Life at 1 800 242-1704.
- Refer to the Forms and Publications section of the Standard Life VIP Room Web site for an explanation of the different types of investment funds and related risks, market indices, investment and plan related fees, and to view the funds' latest audited financial statements.
- Standard Life Canada does not make any recommendation whether it is best to use Avenue portfolios or to use your own selection of investment options.
- If you choose Avenue portfolios, Standard Life Canada may, without prior notice, change the mix and/or investment Funds from time to time which would trigger an adjustment to your current holdings and may increase or decrease the fees associated with the fund or funds affected. The investment instructions for future contributions would be adjusted accordingly.
- If you choose to provide your own instructions, Standard Life Canada is not responsible to monitor the mix but may, without prior notice, change the investment Funds from time to time which would trigger an adjustment to your current holdings and may increase or decrease the fees associated with the fund or funds affected. The investment instructions for future contributions would be adjusted accordingly.
- Market-related funds are not guaranteed and the value of your holdings will vary according to market conditions and the success of the funds' manager. Whether you select an Avenue portfolio or provide your own investment instructions, with or without Lifecycle Movement and/or Systematic Asset Rebalancing (SAR) services, there is no promise or guarantee, explicit or implied, that the selected investments will generate a satisfactory retirement income.
- If MAPP (Monitored Avenue Portfolio Program™) is offered under this plan: The Avenue portfolios and the investment funds available have been determined by Standard Life Canada according to industry practice and to the best of its knowledge, experience and ability with due professional care.

Portfolio Performance Information

- Standard Life has worked with your plan sponsor to develop a concise list of investment options that was used to build a matrix of Avenue portfolios based on reasonable long-term asset allocation strategies. Each Avenue portfolio was created specifically to suit your retirement objectives, based on your investor profile and your investment period.
- The selection of an Avenue portfolio is not intended to be based on the performance of each of the underlying funds or on the global performance of each of the boxes. A performance based selection would defeat the objectives targeted by the Avenue portfolio feature and is therefore not recommended.
- Every type of investment bears a certain degree of risk. Risk and return go hand in hand. Generally, the greater the risk of an investment, the greater the potential of return or of loss. It's important to determine just how comfortable you are when it comes to risk and your money before you invest. Two main factors determine your personal risk tolerance: your investor profile, and your investment period. Finding a balance that you're comfortable with and that makes sense for the long term is the key to successful investing.
- The Current Blended IMF is the average investment management fee (IMF) currently applicable to a given Avenue portfolio. The blended IMF takes into account the IMF applicable to the investment funds in the Avenue portfolio and the weighting of each fund.
